NGA Awards Learning Management Services Contract

BETHESDA, Md.—The National Geospatial-Intelligence Agency (NGA) has awarded a multiple-year, \$176 million learning management contract to Lockheed Martin Integrated Systems & Solutions. This contract continues the Agency's commitment to expand government and industry interactions related to geospatial-intelligence.

The Learning Management Services (LMS) contract covers a 5-year period. It supports NGA's Human Development Directorate by providing NGA employees, elements of the Department of Defense and members of the Intelligence Community with mission-essential technical skills training, systems training, and leadership and intelligence professional education.

The contract is part of NGA's overall long-term Human Development Technology and Services (HDT&S) initiative. In the next few months, NGA anticipates awarding a second HDT&S services contract for Human Capital Management Services as well as a number of small business set-aside contracts for Human Development related services. These contracts will be announced on an individual basis after each award.

The LMS efforts will primarily be performed in the greater Washington, D.C. and St. Louis, Mo., areas. NGA Headquarters in Bethesda, Md., is the contracting activity.

NGA is a Department of Defense combat support agency and a member of the National Intelligence Community. The Agency's mission is to provide timely, relevant and accurate geospatial intelligence in support of our national security. The term "geospatial intelligence" means the exploitation and analysis of imagery and geospatial information to describe, assess and visually depict physical features and geographically referenced activities on the earth. Geospatial intelligence consists of imagery, imagery intelligence, and geospatial information.

Headquartered in Bethesda, Md., NGA has major facilities in the Washington, D.C., Northern Virginia and St. Louis, Mo., areas with NGA support teams worldwide. Visit our Web site at <http://www.nga.mil>.
